I highly recommend anyone needing to take the State Medical Boards to take Kim Fischer's review class. The class was very informative, and reviewed on all the different things in anatomy and physiology that we need to know. I have known Kim now for a year and a half as my instructor and my friend, she was the best instructor I've ever had, and has always found ways to build me up in a positive way. Her teaching methods are above reproach, and the positive attitude she has is very contagious! Kim is the kind of instructor that not only takes time to teach one on one, but encourages you to find ways of learning and remembering on your own. You will thoroughly enjoy the learning process in her class. I'm very glad to have taken it myself, and feel that it is money well spent and believe that you will agree with me. - Lisa T.

Kim's review class was awesome it made everything come together, fall in place so to speak. Not only did she simplify all of the muscles and systems, she connected them so that you could think about what a system does and how it might affect everything else in the human body. Everything she went over with us in review class showed up on the SMB exam in one form or another either as a question or possible choice. I haven't got my test results yet but on more than half of the questions I was able to figure them out by process of elimination thanks to Kim. Kim also gave us positive support, motivation; she encouraged and gave us pointer on taking care of our selves; she helped prepare us for the test in the whole person well rounded way that she does things, emotionally, mentally, physically, and for me spiritually as well as the book info. I do have to mention that by working in a small group like we had I really felt very connected to the other members of the group. God Bless us all. Thank you, Kim you have been a blessing in my life. – Cheryl H.

*I would recommend taking Kim Fischer's Review classes for the State Board Exams. Going into class I felt very unsure of myself and what I knew. These classes are very positive and uplifting. They energize you and help to gain a positive attitude and to be in a positive atmosphere with people who also want to learn and do their best. I've never before had the privilege to be in the company of such great people who all want to help and who will go that extra mile to see you have or know what you need. It just reaffirms that in helping others we help ourselves, and we are all in this life together...."Thank you Kim, I couldn't have done it without you,
God bless and good luck.*
